System Version: 1.0

A Message to Our Requestor

Dear Ma'am Irene Nayve,

We are pleased to present the completed ANECO Feedback System — a digital platform built specifically to make collecting, tracking, and understanding feedback easier for your organization.

We hope this system becomes a valuable tool in helping ANECO continuously improve its services.

What Is This System?

The ANECO Feedback System is a computer-based tool that allows your organization to collect feedback from customers, review the results, and generate reports — all in one place.

Think of it as a digital suggestion box, but smarter.

Who Uses It?

Who	**What They Do**
Customers / Respondents	Answer feedback forms.
Personnel (Staff/Managers)	Manage forms and view reports.
Administrator	Manages accounts and monitors system.

How Does a Customer Give Feedback?

- A customer walks up to a kiosk or screen.
- They choose a feedback form.
- They answer questions using smiley ratings.
- They may leave optional details.
- They submit and see a thank-you message.

What Can Your Staff Do With the System?

- View dashboard summaries.
- Analyze charts and trends.
- Read customer comments.
- Download reports.

What Can the Administrator Do?

- Manage staff accounts.
- Monitor system activity and system logs.

What Makes This System Safe and Reliable?

- Encrypted passwords.
- Auto logout after inactivity.
- Restricted access control.
- Full activity logging.

We appreciate the opportunity to develop this platform and are available for support.

Respectfully submitted,

JAMES MICARANDAYO

RHOWIN JOHN LUMALES
